Throughout 2008 and 2009, Fort Huachuca's Maintenance Division, which is fully resourced and operated by VT Group, completed two separate RESET missions for active and reserve component equipment. The first mission called for the completion of 168 trucks, trailers, generators and air conditioning equipment within 6 months. The second mission involved the repair of 400 trucks, trailers, generators and air conditioning equipment also within 6 months.

To support our assigned tasks, we provide substantial individual and group training, including:

- Operation Platinum Wrench,
- A Reserve Component maintenance refresher training program,
- Performance-oriented training,
- Productivity-based training and
- Platform instruction.

Our expertise in tactical wheeled vehicles, tracked systems and small

arms came in handy as we began troubleshooting, diagnosing and isolating malfunctions, cleaning, modifying, rebuilding, overhauling, repairing, test performance and painting services. The talent and resourcefulness of VT Group personnel was instrumental in Fort Huachuca being designated a Center of Excellence in maintenance support for the Directorate of Logistics (DOL) at a mid-sized Army DOL facility in 2010.

At Fort Huachuca, VT Group also provides transportation motor pool services (TMP) services, responding to more than 10,000 dispatches, carrying 250,000 passengers, making 8,000 shuttle bus runs and driving nearly a million miles every year. We manage and operate GSA and leased vehicles, contract-furnished vehicles, tactical vehicles and material handling equipment (MHE). We also operate truck scales, administer driver testing, issue licenses and provide weekend and holiday shuttle services as required.
